

Suffer The Faster

David Simpson

12/11/05

V1

That day, self-regard for self-abuse
You blamed us for...? You blamed us far away
A flagrant disregard, flaccid and loose
As violence razors...

Ch 1

Razors us free, cuts us free, I will bleed
Suffer for need! Suffer again!
So long ago and far away from here

V2

Accepting, waiting arms beyond your use
The blood-stained caul of favour falls away
And now the knife is sharp, take up your noose
Your silence strives for freedom

Ch 2

Suffering falls. Withered, the long night bleeds
Suffer the faster!
So long ago
Razors us free, cuts us free, I will bleed
Suffer for need! Suffer again!
So long ago and far away from here

Br

You're circling
Your equal rights, a reason to fight
Misery falls and liberty calls
With one voice shall we speak

Coda

The long night bleeds
So long ago
